VOL. 4

December 1892 — June 1893

Ashurst Thursday Dec 8th 1892.

10 Miles.

After the usual morning exercises were over we Bro Goddard and I placed our time at piping our clothing to geather and packing them up for the Compance as we were agoing to send some of them by mail and the time had arived for us to start and take the rest with us, so we were very bissy untill about Ten Thirty when we got all aranged and after Tring my young Horse with the large roads which I had and found that he went all right we bid the folks good bye and went into Palmerston to Sister Jepsons place where we found hir all alone but pleased to see us, so we made our selves to Home and rested untill Dinner was ready when we went up to the Post Office and I got disapointed as no mail had arived there for me, we returned and got our Horses and then we continued our journey on out here to Bro Wilsons place where we were meet by Sister Wilson and family and we had a very pleasent evening or after noon talk with hir and then we took Tea and continued our talk untill Bro Wilson came home from work when we changed our talk and had a short walk around the

place when we came in and waited for some few persons to come over to meeting as they had promised to do so, but we waited in vain in one sense of the word for no one came but we were not much disappointed as we spent the time talking to them and in explaining the Gospel to them as they were both very Young in the Same, and thus the time passed untill Ten P.M. when we again took Tea and then we still talked on about the Gospel untill Twelve Oclock and they were very much interested, and a very good spirit was present and all injoyed the time Prayers were then took part in and all retired.

Fairy Glen Friday Dec 9th 1892.

10 Miles. After Morning Prayers and Breakfast were over Bro Wilson left for his work and we had very pleasant talk with Sister Wilson untill Ten Oclock when we thought that we had better move on as it looked like Rain so we bid all good bye and again mounted our Horses for here where we arived and found Bro Mengies very busy putting up Hay, we put our Horses up and then went to the House where we met Sister Mengie and Miss Miggie His Daughter so we had a very pleasant time with them and took Dinner with them after which it begun to Rain and just pored down preventing them from finishing the Hay, my time were spent in reading

and in the a very pleasent talk was had with Bro and Sister Mengie which lasted untill Ten Thirty when Miss Maggie returned home and we soon retired.

14. Miles. Palmerston Saturday Dec 10th 1892.

It was still raing and very disagreable so I was very undecided about my trip down to Palmerston but it was nearly a fore gone as I needed the money so bad for my trip, we all sit talking untill about Ten when there came a lul in the weather so I made use of it and started having a nice trip as it did not rain any while I was on the road and I arived at Bro Jepsons place just in time for Dinner so there was no time lost in eating and then I went up to the Post Office to see about my Order and found that it had not came so I spoke up to the post master and ask him how it was for he had promised it to me in three days and a week had now passed he then went to work and Telegraphed about it and told me to call in again at about Five P.M. and he thought that it would shure to be in, so I went and got it and then came back down to Bro Jepsons where I stayed and spent the evening with them untill I heard the Salvation Army up the road when I went up to listen to them for a short time

Fairy Glen Sunday Dec 11th 1892

14 Miles. 1 Meeting. We arose quite early so as to get a good early start up to Bro Menzies place where the meeting was to be held, but we found it raining and blowing so hard that we were undecided about going untill about Ten A.M. when Bro Jepson and John and I saddled up our Horses and left for the appointed place where we arived after about two hours hard riding on mixed Horses and ate and then John and I took a walk I gave him an invitation to come and go Home with me when I left on our return to the House meeting was held and we had a good time I spoke for a short time and then Bro Goddard addressed them for some length after meeting Tea and then Bro Jepson and John went back down to Palmerston and we spent the evening in talking with the Saints and I had the Tooth Ache a great deal so I soone retired.

Okungati Monday Dec 12th 1892.

58 Miles. At about Six we arose and layed around untill Breckfast time when we went and got our Horses and came and piped up for the long journey that was before us, so at Eight thirty we got started and said the folks good bye when we road on

on up through Fielding and then along through the roaling hills to where the great Rangitikei Bridge is across the river we there stoped and had a short talk with some natives about the road getting all the infermaton that was possiable when we went on and met a companion on the Road who stayed along with us and showed us the way through on our arival at Huntiravelle we were very tired and it was deamed best that we go on eleven miles farther so as to be able to go through the Bush the next day, we had a hard time of it climing over Vinigar Hill as there had been several large Land Slides there and the mud had got badly worked up so that it was almost impossiable for a horse to ware its way through but we got along nicely and then we came to the great Sugar gourge where the great rail way Bridge is to be made that will take three Years to build we used the Tunal which come out of one side of the mountain and it being such a great distance up the side of the hill that it looked like a small hole not large enough for aman to sit down in after taking all in we went on in where we got a hard reception at a Boarding house for Ten Shillings

Moawhanga Tuesday Dec 13th 1892.

50 Miles.

We arose very early and went and got our horses so as to get off in good time or thereabouts to the place we got some Bread and Butter and milk for Breakfast and then on we went on through the broken up country and finely we reached the Bush which was nice even to look at but the pass rough mud hole that we had to wallow through took all the cream off of all that was to be seen we found a nice place to stop for dinner. so our horses got a slight fill and then we went on and on for the road seemed to get much longer than we had anticipated on it being we we thought that we were nearly through we must arrive and ask about things we also ask him how far to a Maori Kainga and if there was any Mormons there and he told us no there were not and he said that he did not think we could stay with the Maoris so we went on and took the cut off road to the place but we were much disapointed in the Road on reaching the place I ask the Maoris to let us stay but they would not hear of doing so and told us to go on to the Boarding House which we had to do, but we got nice accomidation for the usual price.

Matajori Wednesday Dec 14th 1892.

1 Baby Blessed.

Being very tired from the preavous days ride we did not rush around much this morning and we therefore did not get off untill after Nine oclock but we had not gotten far along the Road when we meet too men coming down the road with a Cart load of Wood who when wer reached them ask us where we were agoing and in reciving to Te Puke for an anawere they told us that they were Mormons and that they wished that we would go up to there place and stay for a while with them so we took the chance and rested up our Horses for a through trip the next day, on our arival at his place we were well treated and had a nice time with them in the evening Karakia was held and we soon retired after wards.

Moturoa Thursday Dec 15th 1892.

56. Miles.

I arose at half Past Four so as to get off early, I first attended to the Horses and fixed every thing ready for starting. so after Breckfast we bid good bye to all and rode away at Six Thirty, we took a nice easy gate and moved along as fast as we thought our Horses would be able to Stand, about Ten A.M. we reached the Desert as it is called, so the roads beeing quite good we went as fast as

we gradually could count a few dozen troops on the
right of Bangalore mountain the highest on the plateau
this body which numbers at present not at 2,000 ft
high with four large peaks near a base of 2 miles
on the centre of this evidently been a volcano at
some past date from one side of this mountain
there is a large accumulation of Rock with a large
hole and a second Mountain just right, from
this large hole there is a large stream of Lava
or between Lava and Stone water gushes out
with such speed that it is therefore for about
half an hour of the rock from which it gushes
the water is a deep cold and shows for about
distance the water is of a greenish hue and the
smell is not strong in it about one mile distant it
is made, in passing the Inspection was in search
of three Europeans from Lahore with
weight that there are no more Lady officials must
always be in each which we left 5 in all at Bangalore
we left a Guard of one native which Lady and
little Lake was under the Charge of Sergt
while passing along the Commandant was seen on
Banks of the great Cauvery Mountain was
perfect water and Bangalore Fort in sight could
easily distinguish this morning the distance was

in action for a great many Years, and it does now some times get over that and then it with report his Self and then the next day a real eruption will take place, it has been known to throw large Rocks of Twenty Hundred lbs. for several miles distant when in real action, this Mountain is a very Large Mound of Earth and has a real Volcano shape to it, in our passing along within 10 miles of the foot of it she sent out three lovely wires of Smoke much larger than usual, and they kept in a curl un till up out of sight. Thus we got to see how it look when in real eruption only on a small scale, we had a lovely clear day and all the sights were just grand on our arival here we found the Saints feeling fine and we were soone made quite welcome, but we were taken for Saints and not Mormon Elders, Shortly after we had got fixed and seated down nice and comfortable there came a cry of "Kai" or food which was done and we saw the fire come up over the top of the Mountain and seemingly pour down the sides like water Shining out of the top and running down the sides this was watched with much interest untill Bed time.

want to talk with us on doing his duties so just as we were leaving a minister came up and told us to leave and never come back and to tell all other elders never to stop at that place when we were passing by, we still rode on reaching the next place of Hot Spring and Lake Ngaroto and the lovely Huka Falls on the lower Waikato River these grand falls are magnificent where the wild flowing river comes dashing on many feet over the rocks and through the narrow gully after viewing them for a short time we left as it was getting quite dark and after riding a few miles we passed a large grove of trees and then all at once we came to a place where the warm springs were thick and we rounded a corner and were going to pass a house we came to the other side, we had just camped for night when being Bro. J. Sen. Hyde and J. M. Sanders & C. Hammerton C.J. Turner and John T. Lawson we all of us made our selves to home and were soon eating supper and talking over our past labors, until an early hour when we retired.

On the next Sunday the 18th 1872.

40. Miles

After fasting a while and supplant with

with Hardtack which were very tasteless and as hard as rock. There was no water where we were only snow melted from the warm Springs and it had a sulphurish taste. After we had moved on for a few miles we stopped and ate what little bit of food we had along with us and to heat our hands we then were on for about an hour when we thought we had got into the right road and then moved on to a small village of miners and stopped for night, having not eaten since 4 oclock this morning. Here we got some milk and a large loaf of bread which was quickly eaten up and then we went straight to bed.

St Regis Monday Dec 17th 1900.

We awoke up early & were up & dressed and we were breakfast soon after 8 on the account of our Horses getting away but we found them and were off as soon as possible having 21 miles more to go. Travelling that about 9 o'clock we came to one of the great and noted Rocky Cities and the Rivers which were viewed with much pleasure we spent a few hours in looking around and Eating our dinner after which we thought about 2 o'clock we left for a short distance when we took through and then we went on for a short distance or more we passed a good comfortable house and then we

Whitangi Tuesday Dec 20th 1892.

There was a very early start made so as to reach our destination in good time but the Rads were very lazy and made it very disagreeable for us still we all moved with ease and at 8 o'clock we stopped and let our horses rest and then we came on arriving here in the center of the settlement about noon where we were met by a large crowd of natives and Europeans by Bros J. H. Stewart C. W. Taylor Carl Petersen Walter Bennion Benjamin Hunter and Hamilton Peterson we had a pleasant talk with them and then we all went to the river and took a Bath after which supper was taken and in the evening Karakia was held where there was some singing done by the Elders and a good time was had by all.

Whitangi Wednesday Dec 21st 1892.

As there was such a large crowd of us present and all seemed to be in confusion I took my Book over to a lone place that had been fixed up for me and there I wrote a letter to my Father Mother and dear sweet little girl after which we all went and took a swim and then the long talks of welcome

came which took the rest of the time and in the evening Bro Taylor returned from Hamilton with Bro Edward Abbott Bro Geo Waite and C. R. Dalton who had just come from Nyasaland on their way with them and then there arose a dispute which lasted until after 12 o'clock.

Mataya Thursday Dec 14th 1876.

There was no move in camp until after the Missionary left but being sure that all was off and making moves to get to the crossing place as soon as possible for fear of some one getting a start from us before us for the new established Laws, and we had to travel over ground which had been burnt for some time as we went the morning air was cold & on the ground was white with frost but we were a doing our best, then however we moved on the after noon we had a very hard time a getting to what we went to return home and were travelling through the country on Tuesday with out paying toll at the ferry and a long way went some people [illegible] Waite and Bro Stanley and Bro Hodgson Bro Stanley and Bro Hodgson and Bro Waite and Bro Hodgson and Bro Waite and Bro Hodgson and Bro Waite

and Miss Sister but my time was spent in talking with Bro Douglass and in the evening we had another gathering of returning to the [illegible] and I [illegible] but there was not the chance to retire.

Hilary Friday Dec 13th 1912.

"Meetings. The same usual talks were made and all passed off in a nice and orderly manner. In the morning I was spent with Bro Douglass until Ten O'clock when meeting was called and we had a nice spirit in our midst Bro [illegible] spoke for some time in the beginning and then Bro Mc Bennion spoke and he was followed by Bro Mc E. Davis and then we [illegible] at [illegible] and during the Dinner intermisson we were kept very busy talking and having our usual sports when at Two O'clock meeting was again called and Bro Douglass spoke for some time and upon the Word of Wisdom after which Bro Mc Bennion spoke for some time being interpretated for by one of the Native Sisters which Bro Madsen spoke for some length and meeting adjourned when we all went to the River and had a Bath and on our return meeting was called which lasted for some time and a good time was had by all present.

dismissed we all came over to the House where we were staying and there we selected a Santy Claus and an assistant and had them prepare presents while we were having "Toasts" and "Songs" and a real pleasent time was experianced by all, and we stayed with it untill One Oclock when all retired to sleep it off and think of what was coming off the next or on Christmass morning in our hung up Stocking.

Waitangi Sunday Dec 25th 1892.

Waitangi Tuesday Dec 27th 1892.

There was not a very early move in the camp but there were very lively moves to get off and to get our things tied up to go so after Breakfast was over the Horses were run in and it was found that there was some of them lost so there were moves made to secure them but they had no success and those that had got there Horses went and made preparations even to putting on there saddles when a rain come up and the time having passed so that we decided not to go so my time was spent in working around and fixing up for a good start to morrow, and a practicing songs to sing in the evening and thus the time passed untill Tarakia, when it was over Mrs Stewart arose and told them that if any of them wished to make a few remarks or ask a few questions that we would be pleased to answere them or give any desired information that would be desired there was none ask so we sang some songs and had a fine time with them untill Ten P.M. when we came over to the place where we were staying and there we received some information and some different points of interest, and with a few stirring speaches we retired.

Kosoko Wednesday Nov 8th 1882.

24 Miles. We all made moves to get off as soon as possible and as soon as Breakfast was over we were mounted and left the place after bidding all goodbye we had some little bother as our Animals for the first few miles but at length succeeded in Mr Palmer found his Horse which had been lost and had caused several days Wandering at the West of the Opotiki road we had Bros Stewart Hanby Hickson and Palmer good bye and continued our ride through the dense bush in the morning we found a good sleeping place with us we called the Council we have and we had a long talk with him in his place before Bed time.

24 Miles. Kokaroko Thursday Nov 9th 1882.

The first we Breakfast just after we got up and we then had a pow wow to go up to Kokaroko and see the natural Springs there. Our Horses were about Six Miles back we walked up the valley about 1½ miles and came in sight of Kokaroko The little Valley was covered with dense shrubs of Manuka as we approached we could hear the boiling water and the dull Thud from some of the Springs and together the Valley has a very desolate appearance the only dwelling was a small Maori whare

where a family resided for the purpose of selling
tell and guiding tourists, near the where were two
boiling lake separated by a narrow neck or a natural
bridge about three feet wide. We stood upon this
bridge enveloped with dense clouds of steam and the
surrounding objects were almost imperceptible, presently the
clouds of vapor were wafted away and we could then
see into the terrible boiling cauldrons below.
The mighty forces of nature appeared to threaten us
with destruction and our point of observation was
appropriately named "The gates of Hades." A short
distance from these boiling springs is a yawning
black pit named the "Inferno" this is an immense
mud geyser and as the seething mass is dashed and
tossed against the sides with perfect fury we are
reminded forcibly of the Methodist Hell.
The Hot water falls consists of a number of small
cataracts flowing over the rocky cliff as we follow the
trail we reach a number of more mud craters and
sulphur Springs. On every Hill side might be
seen Steam holes and we could hear the dull thumping
sound some distance away we returned to Waiotapu
and secured our Horses, thanking our kind friends
for the hospitality we continued our journey.
We passed Rotorua about 11 A. M. and Ohaki Rotoma road

into town for supplies the guard Mahaka remained and
upon had a view of the great Pyramids and gazed
at that place we camped for noon on banks of the
Nairobi and Athi River. After dinner we rode
and our journey and reached Nairobi on the 20th
We were made welcome by the people, who sent
out sticks and a place was allotted us. The people
were quite pleased to see us and we have great
hopes that they will come under the Gospel.

Nairobi Tuesday Nov 30th 1897.

25 Miles. We received an early start and nothing was passed
good bye we rode along and took the Fisheries road
to the shore of the crater eruption of Longonot
which reared several peaks and belonging among them
and showing a vast amount of boulders. We rode
to the summit of the hillfield which we were
covered with forest and reached and obtained a
good view of Longonot. The precipitous sides
in one day the Terrial. eruptions and the
craters were plainly visible. The surrounding
country is a scene of beautiful scenery.
Where the beautifull Lake of Elmenteita
was situated the vast plains of Laikipia are seen
spread out and deep gullies are marked and the
ravines. We rode near the shore of the Lake

and then left our Horses and continued on foot, we climed the steep inclines often pulling ourselves up by the aide of bunches of grass. At times we had to jump across yawning chasms down which we scarcely dare look and finally we reached one of the top gullies, We decended it and followed its course till we reached a stream of cool water which not quenched our thirst, we followed the stream till we found a place where the water began to boil and we were soon surrounded by boiling Springs The water poured steamy over a rocky terrace and when we climed these we hovered a boiling lake evidently on the site of the old crater it was almost too hot to walk over & and it was almost impossible to walk and not step on some boiling hot rocks We got a few specimens and returned to our animals. Tarawera looms up with terriable significance The rift is still hot and steaming and the rocks in this vicinity are too hot to handle. Sticks will quickly ignite if placed in the hot water. Mud and ashes completly cover the surrounding country indicating the extent of the fearful catastrophi.

The gayest burnt banks Lowrys of trees may be seen on the hill sides right inside many making the beauties of the surrounding forrest more & more delightful. Leaving our house we left the beaches Reefs and out sought a more sweeping place. We then sought our trail and followed along till we reached Steamboat Creek Here we stopped to view more gorgeous and beautifull Springs. We then took to the creek of a Gulfin but the clouds began to gather and we feared a storm soon we lost sight of the Gulfin at commencement of rain. We sheltered our horses but a heavy thunder storm met us then before we reached a shelter. The storm passed over and we explored our surroundings and were agreeably surprised to find a good Anchorage of reef barrier and we were soon enjoying a feast as they were all ripe. The natives and aborigines that be were a considerable distance as we took possession of the premises.
We layed down under Wharekiri and felt safe a good place for our beds and then we hung up our clothing to dry and rested up in Blankets to keep warm under our Selves when we retired

Orakeikorako Saturday Dec 31st 1892.

Before breakfast we visited the washdown for both
again and after breakfast we needed more for dessert.
We then saddled our horses and lifted up our pack
horse and after riding a few miles we saw the
steam arising from the mountains so we tied
our animals up to the telegraph poles and viewed
the scene, Ascending the hill we gained a good
view of the Mud geysers, it was a beautifull
sight on account of the varied colour. Each
geyser was about ten feet apart and about
the same in diameter They appeared like
enamel pools of paints, next to the light
blue was a bright red near to which was a
drab and a brown geyser and near to these
was one which appeared like boiling lime.
Soon after dinner we arrived at the
Waikato River, we rode on an embankment and
shouted across to attract attention at the Maori
Kainga which was some distance up the river,
A Maori came on horse back and directed us
to the crossing, on reaching we found our friend
ready to take us across in a waka (canoe)
we had to strike our horses until more half came
before swimming them over. We then prepared

to go over. The Wairoa is a very swift and treachous river and as the swift currents rushed passed we always shuddered at the thought of crossing in such a small boat. The waka was a small canoe hewn out of a log and this was almost too fast with and fifteen feet long. Our boy Hone was to enter with him and he then began with great dexterity to paddle across the little craft was furnished with one small paddle or oar and after witnessing his skillful manoeuvres of it all misgivings vanished. On reaching the King we were received somewhat coolly but only two families were at home and one of them consisted of some Missionaries but they took charge of us and were very kind to us. We then continued our explorations. Pairs and Ngaruhas were observing us very close and along both bank of the river, were our directions was Pairs that could not swim in the [illegible] for about thirty feet, we counted a number of bathing people and as we were returning we met our friend Hone with a kete of potatoes as his friend we found that she were taking them to the sacred Karaka and as they could not pass on the

steam of these holes is used for cooking nearly all of there food, We accompanied him and as he passed the river she lifted the kili in & wash its contence she then proceeded with them to the steam hole in the side of a hill and throwing a sack on them they were left to cook, in the corse of a half hour we were eating some of them and they were well done, we were well cared for and in the evening we held Karakia

Orakeikorako Sunday Jan 1st 1893.

I made the first move in camp this new Year morning by going over to the Hot Spring and taking a Bath the water being of the right temperature I stayed there for some time and Elder Goddard some followed for the same purpose. We were wished the compliments of the season by our maori mother who brought in a nice Breakfast and after doing justice to it we crossed the river again and with our Maori guide we commenced to climb the hills Before doing so we visited a grove of cherry trees and filled our hats with the delicious fruit we visited more of the springs at Ngawhas and at one place the water poured over beautiful

Colonel Lovace. We purchased a few refreshments and then visited the famous "Alum Cave" This proved to be the most interesting and unique sight which we had yet beheld. We were quite shocked with observing the dirty state of our guide advised us to rest and not smoke before entering On reaching the entrance the boys first were breathless with awe we caught our first glimpse of the enchanting scene. We ascended some steps and found ourselves in a perfect fairy land which baffles description. The sun would from an opposite direction and baffle his skill in faithfully portraying it on canvas. The length of the cave is 171 feet the greatest depth is 60 feet and its width 42 feet. The colors on every side are of various kinds and as the sun shines down above a beautiful picture is formed The Alum crystals glisten above and at the further end is a clear pool of warm Water from which the steam arises forming an appropriate back ground. We following our guide into another cave rather a tunnel into the thick darkness. The heat very intense caused us to perspire freely but we endured it sufficiently long to secure a few

specimens and view the beautiful scenic stations of many kinds, We were both to leave such a "scene" but having an appointment for meeting we were compelled to return. We again crossed the beautiful Waikato in a Waka and sought rest during the dinner hour, At 2 P.M. we held meeting with the few people of the place, all three of us briefly addressed the meeting. We after words strolled around and held Karakia in the evening with the Maoris.

Wairakei Monday Jan 2th 1893.

12 Miles I arose before the other brethern and went over to the bathing place and took a bath in the warm water. After which breakfast was served and we in company of some Maoris went down to the river to obtain our horses as we had left them feeding on the other side of the river to Tauhara to It was quite interesting watching them swim rapid turbulent stream and several horses have been drowned in trying to do so. One of the natives held the rope while the other we rowed the horse and they brought us over at a time. It was raining all forenoon but after dinner we decided to travel and ride a short ride over a slim trail. We were accompanyed

by one of the natives and camped for the night with a family of natives on the bank of the Waitaki Our accomodation were not the best but we were made quite comfortable and welcome. We had the company Kuranui with them and they provided us blankets and sought supper

Waimate Tuesday Jan 3rd 1871

33 Miles. We arrived at early about the morning intending to reach Waimate but our horses were so foot sore and we were obliged to have it shoed We journed along Waitaki Lake all day and in the after noon it rained quite heavy and we were glad to seek shelter at the first place we came to. So I rode ahead into a small "K" Waimate and obtained permission for us to stay there All the Maoris were miserable and they professed the "te Hoki faith" They were in a deplorable condition of ignorance and most of the young people only had a loose blanket to cover them. When supper was brought the children could hardly wait whilst the blessing was being asked and ate with the voracity of starved animals. We attended there karakia after which the priestess was given us to suck Dr Coles Nelson witnessed them but it appeared Some later that We might have had us the cows and bought for ourselves to save trouble and

18 Miles. It was still raining when we arose and the Maoris seamed to be in no hurry to arise, So we secaured our horses, and bidding "good bye to all" into the wet we rode out into the storm it was very disagreable but we had to bare it and it was about noon when we arived here at Moturoa, but the hospitalities of Bro Schaer and family were soone shown toward us as they were only residing here tamporly the Whares were not the best but they kept out the rain and we were made comfortable and fed well and enjoyed our selves.

Moturoa Thursday Jan 5th 1893.

We were loth to rise as the rain still continued and all day long we were kept housed up, I did however make a trip over to see our horses and bathe the lame ones leg which was quite bad on account of him doing so much traveling and as we may stop for a few days here I well try and cure him if possible. We spend the most of our time in discussing principles of the Gospel one with another and in setoching one another. In the eveing Karakia was held with the Maoris and a long talk had with them afterwards When I dressed Bro Goddards foil and then we rested

Malvern Friday June 6th 1873.

A bright and cheerful morning greeted us when we awoke but we were not ready to start as Elder Nelson and I had decided upon accompanying Simpson on a short missionary tour in the vicinity. As the day was mostly spent in fixing up things and in arranging our wet clothes upon different lines. After eating Hamilton & myself went down with a large boat which done a great deal for the Goddard, after which we retired early so as to be prepared for our trip upon the Mountain.

Malvern Friday June 7th 1873.

Hillside. Elder Nelson and I arose very early as we desired to early start for Simpsons but our horses being very unwilling to catch we were detained for some time, and we did not leave until 9 Oclock. We traveled on horse back for about five miles and then we tied our horses and continued our journey on foot as there were so many large bottles and the country being so hilly therefore up caused by the roughness and by heavy snow drifts. After some two hours travel we came to a large basin all covered with burnt rock and sand. It has evidently been a volcano at some past time as many things about that way go to prove we made several fine specimens

crater, as we traveled on we had some hard climing to do up large cliffs of solid rock but on reaching the top we found our selves nearly at the foot of the volcanic mountain. We here found a spring of nice cold water so we ate part of the lunch which we had brought along with us. The higth of the mountain is 7.250 feet and from where it comes into a wheat stack stile it is about 3.000 feet to the top. So we got ready to start up the last steap pitch at just two thirty and was just one hour and twenty minuits in reaching the top of the mountain at good hard climing all the way, the first half of the distance was very loose it being composed of ashes from the mountain, as we neared the top the side of the mountain became harder in places it being solid rock and in some places very warm, on reaching the top we were meet with such a strong smell of Sulfer that it stunned us for a moment. Our first moves were to visit the old extinct Volcano or the crater which was steaming all the way around from small sulfer holes it is 125 feet across and has a small Lake in the bottom we then tried to get a view of the active one but failed from where we were so we went out and around the out side of the mountain to a low place where part of the

tops of the hill had been blown off by an eruption before here we got a good view of the action one which fills one with dread and fear to look at it, to see the large quantities of steam that are rushing forth at all the time, want to look into the large black hole from which it comes. The hole is about 100 feet across also the present blowing one there is another small one about 6 ft above 20 feet also in active order. The distance is about 600 feet across the top of the mountain and from all appearances it has all been one solid volcano. After viewing all that was to be seen we started to return and in twelve minutes time found ourselves at the bottom of the hill that took us one hour and twenty minutes to climb, we then finished our lunch and began to return to the ship found our horses where we arrived in the course of about two and a half hours fast going, and we well felt enough to appreciate luxury then that we were saddled up and made for home which we arrived at the rate of about six hours fairly well tired out but we were soon rounds highly well pleased with the day's enjoyment of the pleasures given us by the Captain and officers of the ship from here to Auckland.

Before I had got up two of my applicants came and asked Baptism so I arose and prepared my self for the work and sent one of the Natives up to tell the others about it and have them come and all be Baptised at one time. So at 7 oclock I waded down into the Hairau river and there Baptised my four applicants with a woman standing on the bank a cursing her daughter for going and being Baptised, I told the woman to behave her self or go away when she told me that she was not talking or meaning me at all but her daughter but she obayed me and kept still. but when I went to confirm her daughter she comenc again and told me to name her Mormon and leave her old name out of this church but I ordered silance and got it, until done when they had it hot and heavy but the Young Woman held her point fine and the old Lady yielded to him and peace was again restored, during the forenoon I had a long talk with two old men but they would not yeald when beaten so we talked until all was tired and then they went and left me. and a heavy rain and wind storm came up which caused the place to leake all over and

made me think that I would not be able to get off in the morning, in the afternoon I done some writing in house until twelve evening when a black woman came and asked me around the place but she found his daughter to search for him.

Wahangaunt Wednesday Mar 15th 1852

I arose about 4.30 A.M. and we were soon on the road and made the first Forty miles before we stoped for breakfast we then left the Fork and followed a track on one of the horses and I got on the other one with Louisa a small girl on behind me & baby in my arms with Husband and Keziah a walking we had not gone but a very little ways when we came to a dense bush where the waters had wound through in very irregular shape and so deep that we could hardly

see it any where, so our main guide were the tracks of a horse that had went through three days before and it was only visiable here and there, after winding our way in this manner for six miles we came to the foot of the mountain where the trail went strait up and we had a fine time getting around trees that had been blown down in the heavy South wind, we reached the top of the mountain nearly worn out and there took a rest before proceeding down. and we found it quite necesary as the decent was made with some dificulty there being many trees across the trail and no way out among the sunflyarts which were so very thick all over. so after some two hours and a half winding and a working our way we managed to get to the clearing where Abhangarae stands a distance of two miles, the first person we met was an old man of the Church of England and he would not tell us any thing only that down to the next place they were all Mormons and he did not want any thing to do with them, so after receiving the much desired news we proceeded

and found all that was at home pleased to see us and a fine welcome we got and a very pleasant evening spent in talking and and listening to them talk about the Gospel and their joy in their labors the short time that they have been in the Church fills our with joy to listen to them and to see how the old men labors part that has not yet joined in with us but intends to do so before long

The weather was very disagreable, and my time was spent in writing a letter to Brigham Blackburn and in reading and talking, In the evening a Boat arrived with a lot of fish on and Elder Joe. Linford went to see them when we had the privilage of viewing a so called "Devil fish," This fish had 8 legs and layed in a kind of a star shape, or more approat meme would be 8 long tanglers, and all along the bottom of the tanglers were small funnels with great suction power as they would pick up large rocks and hold them until pulled from it, and by placing one hand on these funnells or suckers they could almost see the fish, the fish weighed about 12 or 15 lb. it was of a whitish tint at first but turned to a redish or a redish brown tint, and had a head and body more like a large Toad than any thing that I can think of. and the length from point of tangler to the point of another was 10 ft and width was 8 ft. and from

point of tongue to beak is just 6 ft, and from the head for about one foot down each leg there is a skin like that between the toes of a duck, forming with this body the fish contained. The feet is very slimy like and one can only hold to it by putting there hand in fingers in its mouth, and it has one large tooth which when taken away renders it quite powerless and taking it as a whole it is not a very pleasant looking animal at best.

35 Miles.

There was another rush this morning as there was
no horse to get in and all of us wanted to leave
early for here, so after Breckfast Mr Rosa's son
came in and ask me to wait for a short time
for his Father as he wanted to see me before I left,

But I had to wait for over two hours before they
came, and then wait and do some little business
with them, making it after 11 oclock before I got off
but I rode very fast and climed the Hill as fast
as possiable, and also wound my way around the
turns in the crooked trail in the dense Bush
at a rapid trace of speed with the hope that I
might catch my companions at a certain point
if they stoped for Dinner, or lunch, but on my
reaching that point, I found out that they had
not stoped, but that they were not far ahead
of me so I still pushed on with the hope of
my catching them before we arrived at the
kainga, but on my arriving out of the Bush
I heard from some maoris that they were only
a few minits on head of me so, I took my
time and we all arrived there together.

Te Hora Tuesday May 30th 1893.

After Breakfast Elder Simpson and I went down to the Post Office and there I got my Home mail, and the Day was spent in reading Letters papers and a Book that came from home written by D.C. Kidd

During the morning I had the tooth ache but I wrote a letter to Mr Hawkins in Blenheim, and then did some reading, after which I took a walk to see my horse, and try and get some thing to stop my tooth ache, but did not succeed and when it relieved I was in great pain.

I had a very trying night of it with my tooth as it ached all night long, and during the day it was very sore, and my Time was mainly spent lazing around and reading, and in the evening a Testimony meeting was held where we had a good time as all took part and made it quite lively.

Te Hora Saturday June 3th 1893.

The wind was very disagreable as the chimly smoked so that it was almost impossable to stay in the house, but we put our time in a reading the news papers, and fighting the Smoke; and we got a chick up in the evening, and then had a time singing with the Saints learning a new song.

After which Dinner was sirved and then all seamed pleased as we were agoing to have some Europeans present at our meeting so Elder Linford and I spent our time studing so as to prepare our minds to address them. And at 2, Oclock meeting was called to order and Elder Linford addressed them in English upon the God head and upon Baptism, After which I spoke to them in the Maori Koo on the same subject, and we had a nice time there being 8 Europeans present, and after meeting Elder Linford Baptized a Young man, and we confirmed him in evening Karakia.

I arose very early as I had a candidate for to be Baptised and I wanted to confirm him on Romans 6 as I done at first thing. And then the most of my time was spent in writing a letter in the forenoon and then I took a ride down to Havelock to see about some books and to get some Salt and on my return me Elder Simpson and I administered to Horata an old Lady who was very sick and her legs were so stiff that she could hardly move them. I then took time and give her some advice about how she was to act or she would not get well. and the evening was passed with the Saints. And after we retired we had a long reading spell in the B of Mor Book and asking questions on the same & preparing our minds

Te Hoia Tuesday June 7th 1898.

The day was a very cold one and we felt like staying in the house, which I done but the wind caused the smoke to be so disagreeable that we had to put the fire out. At noon we Elder L and I took a walk down to the Post Office but we got no mail, so I spent the after noon in writing a letter to Christian Peterson in Palmerston N. and in the evening Hakaraia gave me a Tauna Ki to

just in it and send him as I was in his debt to him and we had a long talk with Te Rapa who had just came up from town with the news that the Saints had just arrived from the Rangitoto Island. so I concluded to stop over next day and see them, and with this conclusion we retired

Te Hora Wednesday June 7th 1893.

It was very cold during the night and there was about an inch of Ice on standing water this morning, And about 9.30 all the Rangitoto Saints came up and we had a plesent time with them as they were very busy telling the news and talking about the good times which they had been having since we left them at Whangarei I also heard of the discussion which had taken place between Jos Hippolite one of the Saints and a Bitter outsider in which Jos H. got the best of the discussion And Hoera then came and payed me some money on the Book of Mormon, and give me 10 Shillings, which I payed a debt with. And at two oclock they left so as to leave on the Steamer at 4 P.M. And I wrote a letter after they left to Miss Emma Woodard. and then we had a talk with the Saints.

1 Meeting

The night was a snapping cold one and I see was very plentyfull But Elder Linford and I made a run through the paddock for some time before we caught our horses, and then one of the saints arrayed who was in sight and I had a long talk with him and gave him a time to appear in and if he did not so it I would not consent to Rebaptize him when the allotted time was up, we then took breakfast and left for here having a lovely day and a pleasant trip only a little long, but we arrived at 4 P.M. and found all well and were quite well taken up by sister Perkins and after a long talk with them we all went up to Hope place as he was rather sick and we held a Testimony meeting there with the saints after nearly all the saints bore there Testimony and a good time was had, and after meeting I had a great many questions to answer from a friend man who was investigating the gospel in good shape, and as I answered all in a satisfactory manner to them and for some of the blessed works to investigate further as he wanted to be prepared to answer all questions and time when he had passed on he said that he would have several questions ask him by some of those opposed to the truth.

Hairau Friday June 9th 1893.

12 Miles. The wind whisled, and the sand flew, and we were very uncomferatable, But I had my Box to do or straiten, and some Books to cover which I went to work and done first thing. And after Dinner Elder Linford and I went up to Blenheim and got some books and to take my watch to get it fixed, we took in the sights of the Kainga or Town and then we came back and held Karakia with the Saints and then came down and done some writing on our Home mail until Bed time.

Hairau Saturday June 10th 1893.

In the morning the folks went up to Blenheim to do some shoping, But the Snow came down in good shape and minded me of home more than any thing I have seen since I have been here, and after in quit storming I went up and done some work at the Brench Book which were in a bad condation, and I wanted to get all straight so as to be able to make out a Report of the district when needed, and then we done some talking with the saints urging them to be diligent as some of them were getting

quite indifferent about whether they done them duties or not. He then had a long talk with a young man by the name of Smith who was investigating the Gospel, and in the evening there was a real row here through jealousy in regards to one young man joining the Church and they beat it in good shape one of the women swore like a trooper and one thing brought up another and we had it until after dark, and then the women said, now that we were staying with you we is a disgrace our Church and beat it in great shape for us, an hour when I told them that if they did not stop that we would leave and go another place, so we got them cooled down and then I went [corrected] there to Bed and left them to settle it out between them selves, which did not take long after a good shake Talking to.
